

Project Engineer (m|w|d) | Smart Mining Solutions

Our company

Our technology company was founded in 2008 and is a leading technology company of modern sensor solutions for the METS sector with core applications in the mining and bulk material handling industries. Thanks to our technology, people work safely even in bad weather. We automate train and ship loaders and create 3D visualizations of machines and stored raw materials. The requirements of the modern mining and raw materials industry are varied and demanding. Solutions from other industrial sectors can therefore often not be used. That is why we use specially developed electronics, in particular a radar sensor technology that is unique in the world. We are headquartered in Germany and are present in all global mining markets where we can offer you a world of opportunities in our diverse business.

We are looking for

You feel comfortable when people talk about industrial engineering, control systems, IT, mechatronics, electrical and mechanical topics in general. Work between hardware, software and technology is an interdisciplinary task you enjoy. Then apply now as a **Project Engineer (m|w|d)** based at our head office in Aachen, Germany.

Your Tasks

- Analyse customer requirements
- Automation solution design engineering (electrical, mechanical & software)
- Project planning & execution
- Technical clarifications with clients and subcontractors
- Support our sales team with technical proposals
- Consult our customers in a genuine fashion and do not think short term
- Document your work and share knowledge in our intranet Wiki

Your Profile

- Successfully completed degree in engineering
- Experience in designing or supporting sensor or automation solutions
- You have previous knowledge in electronics, sensor technology, IP networks or advanced automation
- Strong communication and teamwork skillset
- Independent and structured way of working, confident appearance, and good organizational skills
- Understanding of process automation in mining / raw materials engineering is advantageous

Our Offer

- We offer you varied and challenging tasks in an international project environment
- Flexible working hours and working models make it easy to combine work and family life
- You will have the chance to receive a company pension, a business bike and a childcare allowance
- Work with enough freedom for your own initiative in the Belvedere revolving tower in Aachen
- Ergonomic workplace with feel-good factor, free drinks and relaxed dress code

Please send your complete application documents (max. 5 MB), stating your salary expectations and earliest possible starting date, by e-mail to personal@indurad.com.
