

Project Manager (gn) – Sensor Technology

The company

To enable people to work safely in adverse environments and reduce emissions, indurad has been developing innovative sensor solutions for the world's leading raw material producers since 2008. We combine hardware, software and engineering solutions to enable the automation and digitalisation of processes and increase efficiency for our customers. For example, we can automate train and ship loaders, implement active collision protection and create 3D visualisations of machines and stored raw materials. Our specially developed radar sensors with customised software solutions can be used in harsh environmental conditions, making them perfect for the diverse and demanding requirements of the bulk materials and raw materials industry. We are a diverse team of talented, innovative people focused on making positive change at scale.

We are looking for

a proactive employee for our headquarters in Aachen, Germany, who will take care of the planning, management and control of our customer projects. As a **project manager (gn) – Sensor Technology**, you feel comfortable talking to customers, preparing and monitoring work packages. You also familiarise yourself with new areas of knowledge.

Your work environment

Work in an international and agile team that is actively involved in shaping the business

Our team takes care of the entire customer project process, from the technical review of the order to the final handover. In addition to project planning and steering, our team is strongly involved in the technical design of our solutions with its application knowledge. As the link between internal development and the customer, you ensure the understanding of the customer's individual goals and the successful project implementation.

Work with modern project management tools and integrated controlling

We use modern, integrated tools to synchronize the planning and progress of our projects, both internally with all departments & externally with our customers. Additional online services for project controlling ensure that the team has an overall and detailed overview of resources and costs. Our tools enable us to always keep track of all our customer projects, work orders or contracts. In this context, the team actively shapes and improves the company's processes and guidelines.

Your tasks

- Analysis of customer requirements
- Project planning including active management of the schedule from kick-off to completion of the project
- Taking responsibility for the profit and loss account and the results of the project
- Internal and external communication and reporting
- Preparation of comprehensive documentation including functional descriptions and handover documentation
- Supporting our sales team with technical proposals
- Occasional customer visits (commissioning supervision / audit), mainly in Europe and to a limited extent overseas

Your Profile

- Successfully completed studies in the field of electrical engineering or a comparable qualification
- Good knowledge in process automation as well as in the areas of electronics, sensor technology, network technology or software
- Experience as a project manager of complex machines or sensor technology
- Excellent communication skills and fluency in English. French, Spanish or another foreign language are a plus
- Independent and structured way of working, confident appearance and good organisational skills

What you can expect from us

- Flexible work: Early riser or night owl - Thanks to home office, flexible working hours and a flexible worktime model (full or part time), you can organise your workday yourself. A good balance between work and private life
- We offer an ergonomic workplace with a feel-good factor, drinks, free parking and enough space for your own initiative
- Direct lines to management and superiors, open communication, a relaxed dress code and "you" are a matter of course with us
- We offer an optional company pension scheme, a business bike and a childcare allowance as part of the salary package

Please send your complete application documents (max. 5 MB), including your salary expectations and earliest possible starting date, by e-mail to personal@indurad.com.
